NEW WORLD ORDER

THIRTEEN FAMILIES EFFECTIVELY CONTROL THE CENTRAL BANKS of all the hard-currency countries. These "control banks" all practice FRACTIONAL RESERVE BANKING, which is perfectly legal in the US. Fractional reserve banking means that the bank is only required to hold on hand the small fraction of money (5%) that is needed to cover the fraction of deposits likely to be drawn upon and cashed. Moneys deposited in accounts go into a reserve upon which credit can be issued. In the US credit can be issued to seven times the reserve, in international banks (off shore establishments) twenty times the reserve can be issued as credit. It is important to understand this concept in order to understand the larger picture.

In the mid 1970's, the final phase of System 2000, a "global creditors' unilateral totalitarian plan" was put into effect. A Pentagon official and three other US officials went to the Prime Minister of Nigeria and offered him fifty million dollars in cash to double the price of light crude oil. Nigeria is one of only two countries in the world that produce light crude, which is an extremely pure form of oil whose price sets the standard for all other forms of crude oil.

Armed with the knowledge that, because of their deal with Nigeria, the price of Mid-east oil was about to skyrocket, the international bankers went to the Arabs and said, "We will send the price of crude oil as high as you want if you will promise to invest some of the money you make in the United States."

Nigeria doubled the price of light crude, the price of oil from the Mid-east went up and the price of a gallon of gasoline in the United States jumped

to \$1.20. (My note: In Italy, where I was living at the time, it was costing \$1 a LITRE after the oil price was sent through the roof.) Unwittingly, Americans began to finance System 2000 with every tank of gas they bought.

As the money began to pour into the Arabian countries, the sheiks fulfilled their promise to invest in the U.S. and began buying stocks, bonds, and real estate. More importantly, they put their money into thirty-year timed certificates (drawn up by the international bankers). Remember that Arabs went from camel-riding nomads to wealthy international investors in a very short period of time and they had no grasp of how the banking system worked; in particular, they did not know about the concept of fractional reserve banking.

The international bankers now had millions of dollars locked into timed deposits, and they took that money and loaned out TWENTY TIMES AS MUCH. In 1983, the international bankers created two groups of holding companies to handle all this Arab money. One of the groups took the funds coming in from the Arabs and loaned it out to Third World countries. The purpose of the holding companies, as you will see later, was to remove the responsibility for the money from the banks to a less accountable entity.

The international bankers were aware of the fact that most of the Third World countries knew nothing about running a country or allocating funds. Most had been colonies of some other nation and had only recently begun to govern themselves. The bankers were counting on the Third World countries to squander their money in a short time. They fully intended for these countries to go bankrupt and to be unable to pay back their loans.

The Philippines is one example of what happened to Third World countries in the next stage of the plan. The international bankers went to President Marcos and presented him with a way out of the enormous debt his country faced. They said, "We will forgive your loans - you'll have to pay none of the principal, none of the interest - if you will just sign this agreement: 1) do away with its national currency, 2) go to a debit-card

system where each person is assigned a number and his purchases are debited from his account on a computerised system and 3) sign over perpetual rights to all natural resources in the country.

The offer was tempting since it would put much of the labour force back to work and solve many of the country's economic problems. But Marcos realised that because of the word "perpetual", he was virtually giving away the sovereignty of his country. He refused to sign the agreement. Weeks later he was deposed and his country was torn apart by riots which Jonathon May says were incited by the internal bankers.

Other countries decided to accept the agreement when it was offered to them. Recently Brazil, Argentina and other nations have announced that they do not plan to pay back their loans. They failed to mention that the loans had been excused in exchange for the rights to their natural resources.

At this point all the dominoes are in place and the international bankers are ready and waiting for their opportunity to topple them.

HERE IS THE PLAN. When enough of the Third World nations sign the agreement, saying they are not going to repay the loans they received from the holding company, the international bankers can declare the holding company insolvent. (This is where it becomes apparent why the money was put in holding companies instead of in banks. The holding companies were designed to go bankrupt! Chase Manhattan or Chemical Bank would not have to be sacrificed since they were not responsible for the loans.)

Once the holding company is declared bankrupt, they can legally avoid payment to the Arab nations. The international bankers will say, "Sorry, Arabs. We lost your money. You are broke!" When the Arab nations realise that all their money is gone, they will immediately liquidate all of their other assets. They will dump billions and billions of stocks and Wall Street will collapse. They will put all of their farmland and real estate on the market and land values will plummet. Farmers will have no collateral to borrow against to plant next year's crops and food will become scarce in the grocery stores.

The effect this will have on the American economy will be chaotic. This catastrophic collapse has been purposely designed to throw the American people into a state of confusion. Then the benevolent bankers will step forward saying, "Look what these dirty Arabs have done to you!" and offer a solution to our problems.

Their solution will be to abolish our currency and institute a new form of money. Each person then would be issued a government ID number and would need a debit card to do any business transactions.

Perhaps the biggest shock in May's story is that the "Star Wars" system is only 40% concerned with defence and 60% concerned with banking! These "Star Wars" satellites would link the debit system to a central computer base - a super bank. Transfer of funds between accounts would be instantaneous and the internal bankers would finally have complete financial control. May says the debate over "Star Wars" is all show because the satellites are already in place!

(snip)

Perhaps the best defence the international bankers have against protesters is influencing the public's opinion through the media!!! In his book, "The Naked Capitalist" Cleon Skousen says that, "Nothing panics the international establishment like the possibility of a threatened exposure. Whenever the public has become dangerously aware of the conspiratorial processes operating around them, the vast inter-locking power structure of the entire London-Wall Street combine has immediately shifted into high gear and raced to the rescue. Radio, TV, newspaper, magazines, government policy makers, college officials and other opinion moulders in high places have all commenced a recitation of a carefully prepared line designed to pacify the public and put them back to sleep".

Who actually controls the Federal Reserve? Who are the stockholders of this private corporation? In a legislative session regarding abolishing the Fed, the following eight family banks were named as the owners of the Federal Reserve:

New World Order - By Slave

Rothschild Banks of London and Berlin
Lazares Brothers Banks of Paris
Israel Moses Seif Bank of Italy
Warburg Bank of Hamburg and Amsterdam
Lehman Brothers Bank of New York
Chase Manhattan Bank of New York
Kuhn, Loeb Bank of New York
Goldman, Sachs Bank of New York.

In his book, "To Seduce a Nation" Lindsey Williams lists the same 8 banks.
