Countering Mind Control and Covert Attacks via The Electro-Magnetic Spectrum

Editor: We are most grateful to one of our German speaking subscribers for the following contribution relating to his firm's work over recent years in developing, producing and marketing effective countermeasures to the sophisticated warfare now being waged against seemingly all humanity via what most believe are innocuous data transmission and receiving devices we all have to use e.g. phone, wireless, TV including exposure to radiation from electricity itself and even light.

Mind Control and Electrosmog: Their Threats and Countermeasures

SO, ELECTROSMOG AND MIND CONTROL (MC) concerns you? Us too! However, we have found a solution for at least more than 90% of the population affected by this most insidious form of attack. Having read the following resume of our company's work in developing countermeasures against such attacks, you may wish to purchase one or more source field-harmonisers and test their protective benefits for yourself.

In this article certain aspects of electrosmog and MC associated with UHF radiation, being the most pervasive, will be addressed. The television and film industry both play a pivotal roll in implementing MC by harnessing nature's optical laws. Other methods of MC are now in an advanced stage of development such as holographic projection. Yet other "esoteric" technologies (our term) e.g. radionics, psionics and psychotronics must be considered when endeavouring to take countermeasures.

Also to be considered is worldwide organised stalking and electronic harassment (OS/EH), which has been going on for decades with ever increasing sophistication. This topic will have to be left for another time.

Now to our topic: First it is necessary to have an understanding regarding the problems and dangers of electricity! To begin, some theory on the subject of electricity. Boring? Wait a minute! Please read on!

The Problem

Electricity was discovered some 100 years ago and is therefore, relatively speaking, quite a modern invention, (although not new to nature) that has brought comfort and progress. But there is a downside:—

- 1) Man made electricity is dangerous because of the magnetic and electromagnetic radiation emanating therefrom.
- 2) Ultra high frequency (UHF) electromagnetic radiation is even more dangerous. Wikipedia states: Ultra high frequency (UHF) encompasses a range of electromagnetic waves with frequencies of between 300 MHz and 3 GHz (3,000 MHz), which are also known as the decimetre band or decimetre wave as the wavelengths range from one to ten decimetres (10 cm to 1 metre).
- 3) Extreme low frequency (ELF) modulated UHF radiation is far more dangerous.
- 4) Digital ELF-modulated HF-radiation is worse still and much more serious because it is the type most frequently encountered through using cell phones and watching digital television.
- 5) 5G Wireless radiation from 24 to 90 GHz, being now implemented. MOST dangerous due to high frequency. 3 to 4 times more the effect of microwave oven heating. Heating is not referring to heating a meal, but rather cooking your brain with a mobile phone.

Non-thermal affects are denied by the mobile phone industry. Government defined limits for UHF radiation consider only the thermal affects Unbelievable, but true! Furthermore, limit values differ from country to country e.g. Depending on frequency band Russia allows only 1/10000th of the power allowed in Germany.

Non-thermal radiation emanating from manmade electricity generation and transmission greatly impairs the natural system of intercellular communication. 12.000 initiatives moreover and more than 25.000 studies worldwide demonstrate this.

Because of the powerful mobile phone lobby one can expect no redress from the authorities. So, one must take the initiative to protect oneself, family and friends, that is, if they are willing to listen.

The mobile phone lobby is ridiculing and trivialising end user affects by buying off “scientists” and maintaining the focus on Electromagnetic Hypersensitivity (EHS) rather than the MC implications.

A common argument heard against the dangers of UHF radiation is: “I feel nothing”! Of course not! This is because you have no organs capable of sensing this type of radiation. However, 30% of the population can sense this radiation with

the body as a whole. Nevertheless, it should be noted that 100% of people **REACT** to radiation emanating from electrical equipment and transmission lines. Believe me, it affects people irrespective of their religious belief!

Warning

The unspoken argument goes like this. “Such information applies to women, children, the old and sick but not to me”. If this describes you then stop reading immediately! Trash this paper and increase your life insurance cover for the final onslaught! Apologies for wasting your time and cognitive sleep!

Still reading? – Then be it at your own risk! Note all of the following, because this information is nonsense in the eyes of the mobile phone lobby, education and medical establishments, etc.

Warning of digital television’s DVBT damaging affects to health was given in an open letter to US President Obama, the Senate and Congress of the USA. 12.02.2009 by Dr. C. Waldmann Selsam, Germany.

By the way we have a very insignificant website, which is intentional, for we have no wish to fight corrupt lawyers nor as far as is possible, do we wish to come to the notice of government agencies. Rather, it is to be hoped that our message is being and will be spread by word of mouth and recommendation because.

So feel free to join our campaign!

Table Of Brain Wave Frequencies
See next page

Table Of Brain Wave Frequencies

Name	Frequency (Hz)	Description
Delta	1-3	Deep sleep Coma
Theta	4-7	Dream sleep, trance, deep meditation, hypnosis, normal state of mind
Alpha	8-12	Relaxed state of conscientiousness, eyes closed, meditation, prayer
Beta	13-30	Activated state of conscientious, normal daily activity, eyes open
Gamma	39-80	Binding of attention, integration of sensual impression into time and space.

Some technical information

The most commonly used UHF frequencies in Europe are the 400, 900, 1800 (GMS) and 2200 (UMTS) Mega Hz frequency bands (1 Mega Hz is 1 million c/sec). However, if these are modulated down by repeatedly cutting them in half one ends up with vital biological windows with certain frequencies important for internal biological communication of nerves, cells and DNA.

This is similar to the octavation process in music. That is, when a note is played at the piano, overtones are also produced, influencing the listeners nervous system.

A study has shown that the UMTS frequency band is 40 times more dangerous than the GMS frequency band in terms of causing DNS

damage. If one modulates a UHF signal with an ELF brain wave signal, the range of the brain wave signal is increased dramatically making it possible to influence the thinking and mood of populations over vast areas.

A Piece From The Hall Of Shame

It is said that under the premiership of Margaret Thatcher, scientists were able to pick up brain wave transmission patterns of male apes in relation to their subjection to the chief ape.

These ELF signal brain wave patterns were modified somewhat and then modulated using a portable radar system. (appr. 400 Mhz). With this system they successfully irradiated suburbs where striking workers were rioting. Imagine: this happened back in the 70's. Get the point?

In the meantime different types of MC-technology have been developed for both individuals and the masses such as GWEN towers, HAARP (see picture on top), LOIS and satellites.

Note: HAARP only makes sense together with chemtrails, because chemtrails are creating an electromagnet plasma field (nano metallic particles) in the atmosphere, thereby providing a reflective shield for all kinds of (ELF modulated) UHF radiation. For those interested in researching this further, links can be obtained from Energy7 – see advert. In a certain sense this information is well known. Tens of thousands of bold, truth seekers worldwide are endeavouring to awaken people to these and other threats.

How Does MC Work?

The Creator has shielded His masterpiece, because within the human body there is a multiple protection in place. Therefore some elites are trying several techniques to crack our God given defences both collectively and individually. We will now discuss these attempts: MC means controlling or at least influencing both your mood and thoughts. Most well known: the mass media. Very successful Digital ELF modulated HF radiation, esp 5G technology, is used to evoke neurological reactions and is equivalent to psychopharmakia, e.g. depression, optimism, hate, anger, patriotism, fear, lethargy via radiation. By these

means a potential is created, which can then be used to implant some emotional and cognitive impulse. Its effectiveness has been recently evidenced by the Obamania, funeral hypes (Michael Jackson, Mother Theresa), election campaigns, civil war, riots (France) or in the pacification of cities.

Chemtrails

The principal attack is via the scalar part of this radiation which is, sophisticated interference of two UHF sources to create special effects in that direction. Chemtrails since some time seemingly nano particles have been found to be contaminating tissues, especially the brain, and making it yet more vulnerable to other electrical influences that may be encountered. Heavy metal detoxification is highly recommended as a means to counteract this form of attack. Effective countermeasures are known and are available.

The New Threat

Now we are proceeding towards ever more dangerous and unknown areas in electromagnetic Voodoo to which populations are being exposed. Such attacks cause lethargy, numbing and rigor of the nervous system including cellular and DNA communication. This method facilitates all kinds of MC and electronic interference (of a Voodoo nature) and paving the way (together with TV and video

violence) for all types of satanic and other perversions now spreading amongst our youth and other sections of the community.

The Bible warns against occultism which was and is still very dangerous. However, this type of technical occultism is largely unknown which makes it very dangerous. Just like knives, guns and computers, which can be used for good or evil, the hidden hand within government and the military is not using the former.

Overview of The Bio-Energy Scalar Wave Discussion

Electrosmog is wrongly regarded primarily as a biological, medical, chemical, or biochemical phenomenon, rather than a physical phenomenon. Slowly it has begun to be considered as a BIO-physical phenomenon. Some progress! But it should mainly be considered as a bio-ENERGY phenomenon, which is entering the realm of applied quantum and scalar wave physics.

The technical basis on which applied quantum and scalar wave physics are founded is widely debated. Serious consideration is given to the first, but very little to the second. An overview can be obtained from the home page of Thomas Bearden and Prof. Dr. K. Meyl's website: See footnote.

Related to these theories is the extended unified quantum field theory of the German physicist Burkhard Heim (1925 2001)

Right from its emergence UHF radiation comes with an amount of scalar wave radiation. But why? This much debated phenomena is described by the Lorentz Maxwell field equations and elaborated on by Prof. Meyl.

Scalar waves **CANNOT** be measured with standard physics' equipment, for example one cannot measure the weight of an apple with a ruler. The human body's tissues, organs,

nerves, cells, and most importantly DNA reacts to scalar waves and THESE EFFECTS are measurable. According to the research of Russian molecular biologist Pjotr Garajajev (above), DNA within the brain reacts to light and all forms of electromagnetic radiation.

We have to discriminate between transversal and longitudinal components of HF radiation that may be present. Technically it is the transversal part that is measured. However, the longitudinal part (Scalar waves) is only indirectly measurable which accounts for the so called “losses” in physics, relating to loss of energy, which cannot otherwise be explained.
– Scientific discussion continues.

"Today's scientists have substituted mathematics for experiments, and they wander off through equation after equation, and eventually build a structure which has no relation to reality."

Nikola Tesla

Nicola Tesla (above) had already postulated the presence of scalar waves and had even successfully experimented with them. We will not go into details of this phenomena but rather look for applications in our daily life

Some well known strategies to cope with strain and stress caused by the physical portion of UHF radiation are source switching off, shielding, minimising and increasing distance to the source. However, these strategies are not applicable to scalar waves. Why?

Because UHF carries data such as voice transmission via TV, Mobiles etc. These data carrying scalar waves are biologically significant. It is not practical to reduce the intensity of such radiation received, unless

however, one were to cut oneself off entirely from modern information technology. Even the Amish people are afflicted by chemtrail / HAARP technology. Soon no part of the globe will be free of MC influence.

Do you understand? The body picks up the disturbing scalar wave UHF radiation from data transmission. If someone talks to you, you are receiving data. For example, if a loudspeaker is used it is the same as if someone had whispered into your ear, both carrying exactly the same information. So, what is to be done? One has to compensate these disturbing scalar waves by neutralising them in order to improve the body's ability to protect against these waves.

Another aspect to be considered is NATURAL scalar waves used in nature. Animals and plants “speak”, but this speech is inaudible to the human ear, furthermore, there is communication between all parts of creation. Creation is holistically, fractal and holographically interconnected. Scientific experimentation has determined that plants communicate between themselves to the extent of recognising a lab person who had previously injured one of the plants.

Model of DNA. DNA has capabilities of an electric, magnetic, biophoton and scalarwave antenna, both: circular and rod-antenna.

Minerals, plants, gemstones, mobile phones, medicine and even food transmit a silent message which is picked up deciphered and reacted upon by your DNA. Every cell is a highly sophisticated bio-computer, each with a storage capacity of 3 gigabytes. This reaction occurs in that part of the DNA regarded by “scientists” as junk amounting to some 95% of the whole. In other words scientists designate

Cover CD „Silent Sound” with subliminal message. (Sold out) This serves only as an example in the audibel frequency. Scalar wave techniques are different.

95% of the human genome as junk; what hubris!

How To Win This Scalar Waves “War” in Your brain?

Natural scalar wave communication is highly sophisticated, while not a human language it has its own syntax and grammar. Russian molecular biologist Pjotr Garajajev has done some exiting research on this topic.

Crucially mobile phone induced scalar waves simply produce NOISE thereby disturbing ALL natural scalar wave communication. Some like listening to this unnatural noise modulated down into an audible frequency band not realising the stress it is causing them 24 hours a day, 7 days a week and after year. Consequently, depending on length of exposure, age, state of health and genetics, sickness is inevitable.

Still worse, seemingly some NWO Satan inspired criminals using scientists to combine “noisy” and natural scalar waves by superimposing 2 UHF fields (e.g. digital TV and mobile phone) thus creating an inaudible “inner” voice which can be used to cause aggression, depression, patriotism, shopping frenzy and Obamanias.

In short they can instil any kind of mood assisted and focused by some kind of cognitive impulse being presented by the mass media and making it possible to instil further types of occultism into an unsuspecting public.

To monitor the presence and intensity of “noisy” scalar waves, several medical devices are available; about a dozen different types in all. In Germany, as a rough estimate, there are about 10.000 medical therapists who are equipped with one or other of these devices. Many of the better ones are of Russian origin. Following the decline of the Soviet empire many of their scientists came to the west. Their knowledge merged with that of German scientists resulting in an overall technical improvement.

There are several strategies but we don’t wish to elaborate on this just now, rather focus on the most practical. In Germany there are more than 100 manufacturers of different types of scalar wave modulating equipment etc. called bio-energetic modulators or neutralisers. Uninformed people may call this “esoteric”, but the understanding of “esoteric” must of necessity be redefined and newly understood.

Your grandparents would certainly have considered television as “esoteric” or „occult“. They would have considered this as a case for an exorcist. The fact is that whole populations both in Europe and US are exposed to the aforementioned new kind of electronic Voodoo, mainly in the form of applied scalar waves physics whose effects can be measured. If one can measure, then one can influence and develop counter strategies.

Basically there’s a strong need for improving the energy level of the human body including the tissues, nerves and in strengthening the immune system. Well known strategies are: detoxification, releasing inner blockages, prayer, minerals, vitamins and drinking enough good water (most tap water is contaminated with poisonous chemicals).

However, there is now a new approach: strengthening the scalar communication system of the human body. In the last 10 years we have tested more than 40 bio-energetic modulators and compiled reports giving our expert opinion on these devices. In 2008 a German company came up with its own invention of a modulator,

called Source field-Harmoniser, (Source field stands for Scalar wave and subtle energies) which has been available to the general public. We don't say it's THE best solution, but we claim it is one of the best and CERTAINLY the one with the best cost/effect ratio.

Book from Prof. Dr. K. Meyl, covering aspects of free energy and mathematical descriptions. Scalarwave techniques being used in production of Source field-Harmonizers are different.

	Standby	With Mobilphone	Without Mobilphone
Average	100	100	100
Without Source field-	77	50	
With Source field-	159	145	198

Testing results Source field-Harmonizer

The Results

Our results are the outcome from many test sessions in cooperation with several medical practitioners using different testing methods and equipment. They are statistically significant. Details supplied on request.

The average of all measurements taken from every test subject with no stress factor (e.g. mobile phone) was put at 100%. (blue line)

Standby, meaning having the mobile phone in the pocket without being engaged on a call, reduces this to 77%, active calls reduce further to 50% (both red line).

Applying the Source field-Harmoniser ALWAYS IMPROVES the level of bio-energy: in standby mode by up to 159% while during a mobile phone call up to 145%. is still achieved The ideal is not to carry a mobile phone, but rather carry an Source field-Harmoniser in a pocket, thereby increasing bio-energy levels on average by up to 198% providing an energy surplus that the body can utilise to counteract the multiple stresses of modern living.

NOTE: Source field-Harmoniser do not affect the functioning of electrical equipment, therefore physical counter measures may still be necessary.

Three types of practical source field-Harmoniser are offered:—

1. For mobile phones; small rectangular, 25 x 35 mm diameter and less than 1 mm thick. Simply put it into the battery recess or under covering of Your mobile phone.

2. For home protection; rectangular Source field-Harmoniser should be stuck onto base stations of wireless telephone, computer or to the main source switchboard to cover all minor electric equipment and lights.

Note: solar panels and microwave ovens need an extra one.

3. For personal protection. Egg-shaped Source field-Harmoniser can be used during travel whether by car, plane, electric railroad or in hotels, supermarkets or hospitals!. Or simply under pillow case during sleep

Our Secret, Partially Revealed

We use the phase border technology as described in the book “Die feinstoffliche Erweiterung unseres Weltbildes” from Dr. Klaus Volkamer, Weissensee Verlag. All production is carefully done by hand.

Simple, after 15 years of research and practical experience this now becomes an easy procedure. It is natural and for this reason we give thanks to God, who in these times has revealed this to us simple procedure, when the survival of the whole human race seems to be at stake. It is our fervent hope that at least the

suffering people may derive some benefit from our products. We hold this as a glimpse of new technologies which will soon be in use worldwide.

More and more people are contacting us who have been using our devices to report improved concentration and vitality, reduced fatigue, better sleep, resulting in being more calm and contented mood, increased physical fitness, reduced indispositions of all kinds, plus better metabolism. Physicians and medical personnel will of course say, this can only of course be as a result of the placebo effect. However we on our side claim no medical benefits.

Protection Strategies

In addition to the previously mentioned protection strategies such as switching off at source, screening, increasing distance from the source, one may need some professional help in determining the not so obvious points of danger. Alternatively one can obtain a relatively cheap detector.

Immediate health benefits may often be obtained by removing all wireless equipment such as telephones, clock radio, television, electric blankets, microwave ovens and computers to name a few. Preference should be given to cable connected phones.

Avoid having mobile phones on the hip as fertility can be impaired. Ideally, such should be shielded, property from electrical radiation which can be expensive. Aim to keep healthy, as people with impaired health are more susceptible. It is dangerous to fall asleep while watching TV, as the subconscious mind is particularly vulnerable to MC. Do not use TV, radio etc for background listening as again the mind is more susceptible to MC.

Scalar Wave Detector

In large conurbations electrical radiation from neighbouring buildings can be a problem, but the first priority must always be physical reduction then ADDITIONALLY scalar wave neutralisation.

So to protect ourselves, we must understand how quantum and scalar physics is being used

against us because to know how we are being attacked is as important as to know by whom.

We trust this article will enable you to protect yourself from the MC programs of the elites.

Progress comes from single creative inventors and members of society. Many have lived in Germany and German speaking countries, others in Russia and United States.

Editor's Note

The advert below gives Wolfgang's contact details for those wishing to obtain further information or to purchase Source field-Harmoniser that are on offer.

For those interested in researching this subject further the author has provided a number of interesting links for those with Internet access which are detailed below:—

Contact Details

Source Field Harmoniser For Mobile: € 67, Personal protection € 69, each. For houses, flats etc available. [Click Here](#)
