Architecture of Power

By Robert Shaw

BOOKS ON THE CITY OF LONDON AND THE SECRET POWER IT WEALDS OVER THE UK AND THE REST OF THE WORLD ARE HARD TO COME BY, so it is pleasing to see a new book on the subject has now been published, *The Architecture of Power*, by Robert Shaw. Available at a reasonable price from [Britains Hidden History](#)

The author's great find, the Parliamentary report on the fire that swept London in 1666, confirms what many have suspected that it was no accident, but another false flag, The enemy has used the same ploy down the centuries and it works every time, because people ignore to study their history. The apprehension of incendiary planters by the King's Guards and then not being heard of again, would imply that they were in the employ of the King, which is the author's view. However, when one has an understanding of the ruthlessness of the enemy, its more likely that the King was manoeuvred into this act of destruction or even done without his knowledge as they control the levers of power.

Both James I and Charles I were controlled by their favourites, so it is unlikely things would be any different under Charles 2, bearing in mind during the interregnum period, Charles, for the most part was a pauper. There would be a heavy price to pay for the finance necessary to regain the throne, and that would be to facilitate the rebuilding of the City in the enemy's image with total disregard to the poor people living in Cheapside.

In the rebuilding of London, the author goes into fascinating detail, especially the churches that Hawkesmoor built, and the significance of their alignment to form the eye of Horus. This is signifying to the world that "Big brother is watching you"! It was one of the Cities ruling elites that once stated "there is no secret which is not unknown to us"! Most of the civilised world has sleep walked into captivity and again become slaves of Egypt and Babylon(don).

The author's assertion that the City of London's conquest of the world was British, is only true in the sense that it originated from the Island known as Britain. It was The International Trade Cartel, the Merchants from the East operating under various names that were the real villains. The true British acted as mitigating force for good between the natives and the real rulers.

However, this is not to be taken as a criticism of the author as very few understand that there is a chameleon like enemy operating in our midst and as one great person said; "One can identify the real rulers of a country by those whom people speak of in whispers behind closed doors". Likewise the author's statement that Christianity was a passivist Faith, which it is not, taken from a misquoted verse out of context trotted out by state controlled churches ad infinitum. It's not pointed out that Hebrew has over seven different words for enemy, the enemy to which you should turn the other cheek, is an annoying type of neighbour. In other words concentrate your efforts against the real enemy not amongst yourselves as the Christian European Powers have been doing down through the centuries!

Robert Shaw's book is full of other interesting information, such as who was really responsible for the Gunpowder Plot and how the elite protected themselves against the plague, plus many other stories to many to mention here. It is therefore recommended that you purchase a copy while it is still available as these types of books have a habit of disappearing!
