**F**UNERAL, PERHAPS THE CRISIS HAS ALREADY HAPPENED. However let us recall that the Archbishop passed the candle to Prince Charles and it is with him that the relationship between the Church and the monarchy seemed threatened.

Prince William is a Windsor, but he will never avoid the fact that he is also a Spencer. His uncle, Earl Spencer, blood relative of Diana vowed before her coffin to ensure that her sons' souls are; "Not simply immersed in duty and tradition but can sing openly as you planned."

This fifteen year old young man, Prince William, heard these dramatic words with his face cupped tightly in his right hand, a position he almost never altered through out the service. The responsibility that he bears for the future of the Monarchy will come to the ultimate crisis point when the European Union moves to finally demolish the throne of the Lord upon the earth.

Then surely will the fury of the Lord be in evidence and all the rebelliousness that exists within William will be needed to face what must inevitably be the great constitutional crisis.

It does seem clear that this resistance will not come from his father, Prince Charles, and in this respect we might note that Diana's funeral came precisely 69 days short of Charles 49th., birthday on the 14 of November 1997. The first anniversary of when the Stone of Destiny was removed from Westminster Abbey. The number 69 is related to troubled times; times toward which we are undoubtedly moving.

## **Western Kansas Is Finally On The Map.**

An Earthquake , with the epicentre located at Pence was reported by the Dodge City , national weather service , late in the afternoon of March 11, 1998. Not much movement was felt at Doge City, but the walls and roof of the Scott City airport buildings shook , according to Chuck Smith. And the bar inside of the building vibrated for about 1 minute. At Scott State Lake it was definitely felt.

At the south entrance to the Park, a Picture Window in the home of Floyd Dirks was broken, as the house shook. North west of Pence about 2 miles at the Gary Tucker home, according to Gary, it was definitely felt as muffin pans came off the wall and started flying toward him. He also felt the movement and the moan of the earth. So we are on the map. Pence is my old home base , both north and a bit× south of there were my homes so although I did not notice the quake here in Scott City, still I know the people who live in the area and many of them have stories to tell. Thus we are on the map. We have been known as the Little grasshopper state, the Tornado state but now you have to add an earthquake. So we are on the map. HA!
