Psycho-Electric Weapons

A JOURNALIST WHO REQUESTED DOCUMENTS USING THE FREEDOM OF INFORMATION ACT received additional files on “remote mind control” and the effects of “psycho-electric weapons”.

A journalist working for the non-profit organization [Muckrock](#) made a bizarre discovery after requesting documents from the US government through the FOIA. Indeed, as part of an ongoing investigation about Antifa and white supremacist groups, the journalist sent a request to the Washington State Fusion Center, a Department of Homeland Security, which specializes in counter-terrorism, detecting criminal activity, disaster planning, cyber-security and other threat assessments.

Along with standard documents such as emails, intelligence briefings, and bulletins, the journalist received a bizarre file named [“EM effects on human body.zip”](#).

One document describes the effects of “psycho-electric weapons” including “forced memory blanking”, “forced rigor-mortis” and even “forced orgasm”.

Another document explains biomagnetic fields and brainwaves (Alpha, Beta, Delta, etc.) two concepts that are extremely important in MKULTRA and [Monarch mind control](#).

Bio Electromagnetic Human Brain Wave: Spectrum: Emission or wave propagation (Electronic Signal). To make communication, to identify any object emitting frequency. Human body emit very Low electronic signal as temperature/heat (Brain Wave Delta, Theta, Alpha, Beta, Gamma etc). - Bio Electromagnetic Field which is unique for every human body. This is Elec-

Although these documents were sent by the WSFC, they do not appear to be created by a government agency. The first image “Psycho-Electric Weapon Effects” appears to be part of a [1996 article from Nexus Magazine](#) which describes a lawsuit brought by John St. Clair Akewi against the NSA. The 1992 lawsuit claimed that the NSA had the “ability to assassinate US citizens covertly or run covert psychological control operations to cause subjects to be diagnosed with ill mental health”. The article states:

A lawsuit filed against the U.S. National Security Agency reveals a frightening array of technologies and programs designed to keep tabs on individuals. The following document comprises evidence for a lawsuit filed at the U.S. Courthouse in Washington, DC, by John St Clair Akwei against the National Security Agency, Ft George G. Meade, Maryland (Civil Action 92-0449), constitutes his knowledge of the NSA’s structure, national security activities proprietary technologies and covert operations to monitor individual citizens Ed.

The image also contains the web address <http://www.raven1.net> which is now offline.

The author of the second document appears to go by the name Supratik Saha a “Software And Electronics & Comm. Engg”.

The Muckrock journalist has no idea how he ended up with these documents.

“It’s entirely unclear how this ended up in this release. It could have been meant for another release, it could have been gathered for an upcoming WSFC report, or it could even be from the personal files of an intelligence officer that somehow got mixed up in the release. A call to the WSFC went unreturned as of press time, so until we hear back, their presence remains a mystery.”

– Muckrock, [Washington State Fusion Center accidentally releases records on remote mind control](#)

While these documents were probably not created by the government, they appear to be relevant enough for the WSFC to keep them archived. Could these documents explain the [mysterious Cuban “sonic attacks”](#) where 24 government officials suffered “hearing loss, dizziness, sleep and vision problems, tinnitus, headaches, fatigue and brain damage”? Nearly all of these symptoms can be found in the first document.

NSA Signals Intelligence Use of EMF Brain Stimulation

NSA Signals Intelligence uses EMF Brain Stimulation for Remote Neural Monitoring (RNM) and Electronic Brain Link (EBL).

EMF Brain Stimulation has been in development since the MKULTRA program of the early 1950s, which included neurological research into radiation (non-ionizing EMF) and bioelectric research and development.

The resulting secret technology is categorized at the National Security Archives as "Radiation Intelligence", defined as, "information from unintentionally emanated electromagnetic waves in the environment, not including radioactivity or nuclear detonation".

Psycho-Electric Weapons

Signals Intelligence implemented and kept this technology secret in the same manner as other electronic warfare programs of the US Government.

The NSA monitors available information about this technology and withholds scientific research from the public. There are also international intelligence agreements to keep this technology secret.

The NSA has proprietary electronic equipment that analyse electrical activity in humans from a distance. NSA computer generated brain mapping can continuously monitor all of the electrical activity in the brain continuously. The NSA records and decode individual brain maps (of hundreds of thousands of persons) for national security purposes. EMF Brain Stimulation is also secretly used by the military for brain-to-computer link (in military fighter aircraft, for example).

For electronic surveillance purposes, electrical activity in the speech centre of the brain can be translated into the subject's verbal thoughts. RNM can send encoded signals to the brain's auditory cortex, thus allowing audio communications direct to the brain (bypassing the ears). NSA operatives can use this covertly to debilitate subjects by simulating auditory hallucinations characteristic of paranoid schizophrenia.

Without any contact with the subject, Remote Neural Monitoring can map out electrical activity from the visual cortex of a subject's brain and show images from the subject's brain on a video monitor. NSA operatives see what the surveillance subject's eyes are seeing. Visual memory can also be seen. RNM can send images direct to the visual cortex, bypassing the eyes and optic nerves.

NSA operatives can use this surreptitiously to put images into a surveillance subject's brain while they are in REM sleep for brain-programming purposes.
