Money Creation Deception Defrauds The Whole World The True Nature of The Jew Scam By John Kaminski

IT IS NECESSARY TO REDUCE, IF NOT DESTROY, the tendency of Jewish people to practice a very great number of activities that are harmful to civilization and to public order in society in all the countries of the world.— Napoleon Bonaparte, 1808. (Quoted by Stephen Mitford Goodson in *A History of Central Banking and the Enslavement of Mankind*, 2014, p. 54)

If usury remains intact, then the world must brace itself for a depression, similar to the Dark Ages, which will last for many centuries.
— Stephen Goodson, 2013

We live in the dark, convinced by our public media and our insincere leaders that we are heroes and freedom fighters. In reality the opposite is true: we are the plunderers, the ravagers, deceiving ourselves to do the dirty work of the manipulators who have twisted our minds with trinkets and false accounts of the people we kill and the countries we ruin in order to steal their treasures.

And the saddest part — the punch line that proves how stupid we are — is that we never profit from the invasions we are cynically ordered to conduct.

The bounty always goes to the swindlers pulling the strings, and we, as the agents of banditry, time and again, are always left to suffer the same fate of the people we have robbed when we are robbed ourselves, of not only our treasures, but of our dignity, shortly before we are robbed of our lives.

It is the way history has always gone. The ignorant masses are persuaded to commit the crimes of the rich and as the unwitting perpetrators, we ultimately suffer the same fate as the victims, while the rich snicker in their palaces and plot their next swindle.

The reason that you can't see what is going on in the world is because of the brainwashing of Jewish media, which are owned by the masterminds committing the crimes who have brazenly and cleverly inverted good with bad, and liberty with tyranny. And the ignorant public nods approvingly, like bobble-head dolls unable to perceive that this deception makes a few people rich and a lot of people dead.

When you analyse the pattern of wars during the past two millennia, the modus operandi becomes clear: countries with their own national bank, working for the benefit of their own citizens, are swallowed up, bludgeoned into submission by the international financial behemoth that sinks its fangs into healthy nations that are suddenly declared evil by those with the power to poison millions of minds with a single surprising and false bulletin.

Think Iraqi weapons of mass destruction or Germans gassing 6 million Jews, two deliberate lies that sealed the fate of millions of innocent people. This is the political pattern ascendant in the world today, as it has been dominant for at least the past 400 years, or since the Jews wormed their way back into Britain using their trademark techniques of bribery, blackmail and murder.

When you realize that the serial obliterations of Libya, Syria, and Iraq — and earlier, that of Germany, Japan and Italy in World War II — were all because these countries had their own honest banking systems, and refused to be swallowed up by the criminal Rothschild central bank scam which robs countries of their hard earned money — you will begin to understand how you have been swindled throughout your lifetime by lying newspapers and fatheaded commentators in the pay of the criminal bankers themselves who have convinced you that you have been experiencing freedom when in reality you are locked in the prison of usury and giving away more than half the earnings of your labour to goons who create

money out of nothing and then steal even more from everybody on the planet.

Stephen Goodson's *A History of Central Banking and the Enslavement of Mankind* (2014) is a clear exposition of how Jewish bankers have swallowed up the world with their diabolical lending scheme. When you realize the evil and destructive nature of this scam that has fooled absolutely everyone, you will realize that the United States of America is not only on the wrong side of history, but principally responsible for the destruction of the human race.

You will realize that all the wars America has fought have served to impose tyranny on luckless countries where freedom had previously existed, especially in Russia and in Germany. And all that disingenuous rhetoric about democracy and liberty has merely facilitated a tidal wave of lies engulfing everyone in the suffocating debt prison of fractional reserve lending.

This becomes obvious when you realize that all the wars of both today and yesterday, for as far back as you care to calculate, have always been engineered by the most powerful central bank in the world against countries attempting to avoid its malignant control.

Jews have always targeted all countries without a central bank for robbery and destruction, just as they are doing at this very moment.

Goodson, a former director of the South African Reserve Bank and an acknowledged expert in the history of finance, takes his historical analysis all the way back to the early days of the Roman Empire.

Major factors in the decline of the Roman Empire were the concentration of wealth, the absence of mining deposits for industrial production, and the vast importation of non-White slaves with the resultant degradation of the genetic value of the nation.

A footnote in the text describes in one paragraph the entire history of how empires meet their untimely ends.

Money Creation Deception Defrauds the Whole World

When the Government of Old Egypt fell, 4 percent of all the people owned all the wealth. When Old Persia went down to destruction, 2 per cent of the people owned all the wealth. When ancient Greece fell in ruins, one half of 1 per cent of the people owned all the wealth. When the Roman Empire fell, two thousand people owned the wealth of the civilized world. Then followed the Dark Ages, from which the world did not recover until wealth was no longer concentrated. Today (quote written in 1958) less than 1 per cent of the people control 90 percent of the wealth of these United States.

Goodson concludes:

No society can survive a false economic system. For any society to function and prosper it is absolutely fundamental that the means of exchange be issued free of debt and interest by the legal authority as representatives of the people in perpetuity.

Needless to say, this advice has not been followed throughout history and the results have been disastrous.

Western civilization really begins in England, and according to Goodson, it was King Offa of Mercia in the eighth century AD who first invented coinage on the island, a pound of silver divided into 240 pennies. In 787 he banned usury, a tradition that was upheld by his successors King Alfred the Great and Edward the Confessor, who commanded that usurers forfeit their property and be banished for life (a rule we could sorely use today).

The Jews arrived with William the Conqueror in 1066 and all hell broke loose, interest rates soared, and the populace suffered from Jewish predation until 1215 when the nobles forced the evil King John to sign the Magna Carta. In 1290 the English had had enough and the entire Jewish population, some 16,000, was forced to leave England forever.

Some 400 years later, Portuguese Jews pretending to be Christians wormed their way back into England and thanks to the machinations of a traitor named Oliver Cromwell, who managed, after a mock trial, to murder the king and eventually create the money sucking monster known as the Bank

of England, which rules the entire world today from its fortified enclave known as the City of London.

Henceforth a pattern would emerge where unnecessary wars would be embarked upon which simultaneously increased the national debt and the profits of the usurers. Significantly, most of these wars were started against countries that had implemented interest-free state banking systems, as was the case in the North American colonies and France under Napoleon.

This pattern of attacking and enforcing the bankers' system of usury has been deployed widely in the modern era and includes the defeats of Imperial Russia in World War I, Germany, Italy and Japan in World War II, and most recently Libya in 2011.

These were all countries which had state banking systems, which distributed the wealth of their respective nations on an equitable basis and provided their populations with a standard of living far superior to that of their rivals and contemporaries.

In the 18th century, the money mad British conducted three major wars, against Spain, the fledging U.S., and France. The principal objective of the war against France was to destroy Napoleon's debt- and interest-free system of finance. So too was the purpose of England's second war against the American colonies. And so too the purpose of the Jewish bank is stunningly revealed by the sad misfortunes of the English people.

In order to destroy Napoleon's state bank, it cost the deluded British public a staggering £831 million, of which over £2.5 billion were still outstanding in 1914. The principal of £504 million had over the intervening period increased fivefold as a result of the compounding effect of interest. [. . .]

England is still paying Jewish bankers for the cost of the loans it took to wage their wars.

At the start of World I in 1914 the national debt stood at £650 million. On March 31, 1919, it has increased to £7.434 billion, of which £3 billion is still outstanding after 95 years at an interest rate of 3.5 percent per annum.

[. . .] In World War II the national debt rose by almost 300 per cent from £7.1 billion in 1939 to £20.1 billion in 1945. As of June 2014, it stands at almost £1.3 trillion. However, if one includes all liabilities, including state and public pensions, it exceeds £5 trillion.

So, this was the early history of the destructive practices of the Jewish money scheme. We come into modern times with the same evil antics practiced against very happy and self-sustaining countries, France, Russia, Germany, Japan, and in more modern times, Iraq, Libya and so many other innocent victims, all tortured and destroyed by the Jewish predators and the traitors they bought with their ill-gotten gain.

All of these beautiful countries turned into lobotomised vassal states of the greatest and longest lasting evil the world has ever known — the Jews. Benjamin Franklin's celebrated trip to England where he told the story of Colonial script began a siege of America by the Jewish bankers that remains in force to this day. Asked by parliament to explain the source of prosperity in the American colonies, Franklin replied:

In the colonies we issue our own money. It is called Colonial script. We issue it in proportion to the demands of trade and industry to make the products pass easily from the producers to the consumers. In this manner, creating for ourselves our own money, we control its purchasing power, and we have no interest to pay anyone.

The following year the Bank of England began its financial assault on American freedom, first with a Currency Bill that was to trigger the original Revolution, then by flooding the colonies with counterfeit money, then by establishing central banks that presidents fought to disband, and a century later, with the establishment of the Federal Reserve scam that plagues America to this day.

England played the same game in precipitating the French Revolution. Goodson chronicles chapter and verse of the continuing battle of the English bankers against the fledgling American republic — bank panics and artificially induced recessions — right down to the Panic of 1907, which set the stage for the creation of the Federal Reserve.

". . . since the inception of the U.S. Federal Reserve," Goodson writes, "the U.S. dollar has lost 97 per cent of its purchasing power, and there have been 19 recessions, the great depression of the 1930's and the current great depression which started in 2008, and notwithstanding mainstream media propaganda, appears to have all the symptoms of a depression. Since 1910, the National Debt has increased from \$2.65 billion to \$17.5 trillion in 2014, while unfunded liabilities exceed \$240 trillion."

Most of us know the trials and tribulations in the U.S. throughout the 20th century caused by the tyrannical bankers, but what most of us don't realize was the admirable condition of Russia throughout the 19th century that has been totally misrepresented by totally untrustworthy Jewish media throughout our lifetimes.

Thanks to the sound fiscal policies of the czars, by 1914 Russia had become one of the leading lending institutions in Europe. It had the smallest national debt in the world, by far, it had abolished slavery before the U.S. ever did, it enabled a majority of its peasants to own their own land, and its agricultural production was the highest in the world.

It had amassed more money than any other country in the world, education was free up through college level, and its labour laws were praised by U.S. President William Howard Taft.

Goodson summarizes the picture of Russia that has been so debased by Jewish propagandists advocating Communist "liberty" for the whole world:

The people of all races in the Russian Empire have an equality of status and opportunity which was unparalleled in the modern world. His Imperial Majesty Tsar Nicholas II (1868-1918) and his state bank had created a workers' paradise that was unrivalled in the history of mankind.

The Rothschilds and their central bank destroyed this wonderful country, and according to Aleksandr Solzhenitsyn, murdered 66 million non-Jewish people in the process. Their unending spree of mass murder and robbery continues today, championed by the killer puppets of the United States doing the bidding of their Israeli masters.

Long before the British hero Winston Churchill had turned into the mad bomber of World War II, he was a credible social critic, and in 1920, he blamed the Bolshevik Revolution on "a world conspiracy for the overthrow of civilization and for the reconstitution of society on the basis of arrested development, of envious malevolence and impossible equality —"

The American Hebrew magazine that same year boasted—

The Bolshevik Revolution in Russia was the work of Jewish planning and Jewish dissatisfaction. Our Plan is to have a New World Order. What worked so wonderfully in Russia is going to become reality for the whole world.

The U.S. Senate agreed with this conclusion in 1921 when it was recorded that "Full responsibility for the first World War lies on the shoulders of the International Jewish bankers. They are responsible for millions of dead and dying."

Yet the real lasting legacy of that disastrous second decade of the 20th century was the Federal Reserve. Goodson writes:

—it took a mere six years for the U.S. Federal Reserve Bank to destroy the value of the dollar. Between 1914 and 1920 prices rose by 125 per cent reducing its value by 56.1 per cent.

After that, things only got worse, when bankers engineered the Great Depression. "It was a carefully contrived occurrence," said Congressman Louis T. McFadden, who was later to be assassinated for his forthrightness. In his 1932 speech to the House of Representatives, he summarized: ". . . The international bankers sought to bring about a condition of despair so that they might emerge as the rulers of us all."

Those bankers took money out of this country to finance Japan in a war against Russia. [. . .] They financed Trotsky's mass meetings of discontent and rebellion in New York. They paid Trotsky's passage from New York to Russia, so that he might assist in the destruction of the Russian Empire.

Clifford Hugh Douglas has been virtually forgotten by history, but he was an engineer who proposed that instead of the income tax everyone should be given a national dividend to bridge the gap between earnings and prices. Douglas's economic theory, known as Social Credit, advocated the transfer of the money creation process from private banks, which create money out of nothing, to a state bank. Only Japan adopted Douglas's methods, but by then, World War II was under way, and the initial success of the system was never allowed to develop.

But the one place where the state bank idea did develop — and flower — was in National Socialist Germany, where it created what everyone agrees was an economic miracle at a time when the rest of the world was in the throes of the Jewish created Great Depression.

Gottfried Feder's plan to abolish interest servitude was enthusiastically adopted by Adolf Hitler, who wrote:

The sham state of today, oppressing the working classes and protecting the pirated gains of bankers and stock exchange speculators, is the area for reckless private enrichment and for the lowest political profiteering it gives no thought to people, and provides no high moral bond of union. The power of money, most ruthless of all powers, holds absolute control, and exercises corrupting, destroying influence on state, nation, society, morals, drama, literature and on all matters of morality—

Hitler's conclusion:—

Our financial principle: Finance shall exist for the benefit of the state; the financial magnates shall not form a state with the state. Hence our aim to break the thralldom of interest.

"From being a ruined and bankrupt nation in 1933 with 7.5 million unemployed persons," Goodson writes, "Hitler had transformed Germany into a modern socialist paradise.

After 1939, "Hitler was now his own banker, but having departed from the fold of international swindlers and usurers, he would, like Napoleon

Bonaparte, who in 1800 had established the Banque de France as a state bank, suffer the same fate — an unnecessary war followed by the ruination of his people and his country. "It was this event which triggered World War II — the realization by the Rothschilds that universal replication of Germany's usury-free state banking system would permanently destroy their evil financial empire. In Europe this enslavement was finally achieved with the establishment of the Rothschild controlled European central bank on June 1, 1998 and the introduction of the euro on January 1, 1999."

At its brief high point, Hitler had succeeded in making Germany exactly what he wanted it to be.

The Germans were now the happiest and most prosperous people in the world, fully employed and enjoying one of the highest standards of living. This success was achieved by the hard work of the German people and with the support of an honest money system not based on usury or the gold standard.

Goodson further notes "The state of German armament in 1939 gives the decisive proof that Hitler was not contemplating general war, and probably not intending war at all," which is a fact most of the people in the world simply refuse to know, thanks to the constant bombardment of Jewish lies. Meanwhile, on the other side of the world, when Japan adopted C. H. Douglas's method of social credit, its economy skyrocketed, and it made itself a target of the Jewish financiers who had captured the Western world with their debilitating central bank scheme.

"His system of social credit was enthusiastically received by both the government and industry," Goodson writes. "The Bank of Japan reoriented itself to the needs of the nation, rather than to the parasites in New York. Unemployment declined, industrial disputes decreased, manufacturing output and national income increased markedly, exceeding by a wide margin the economic growth of the rest of the industrialized world.

"By the late 1930's Japan had become the leading economic power of East Asia and her exports were steadily replacing those of American and

England. The Jews at the Federal Reserve concluded war was the only answer to this economic threat . . ."

A continuous series of provocative measures by the Jewish controlled United States forced Japan into World War II. Roosevelt closed the Panama Canal to all Japanese shipping, and a rubber and oil embargo was enforced, causing the loss to 88 percent of all its supplies. Without oil Japan could not survive.

General Tojo explains in his diary how the U.S. continually thwarted Japanese efforts at maintaining peace. The economic blockade put a noose around Japan's neck. Japan had to retaliate in order to survive.

Following Japan's defeat, the U.S. restructured the Japanese banking system to resemble the Rothschild Western models, which emphasized robbing the populace and stealing the nation's profits.

The only positive chapter of Goodson's opus concerns the state bank of North Dakota, the only state in the U.S. that is not technically insolvent, precisely because it has a thriving state bank founded by a coalition of farmers that is only concerned with the affairs of its own state and doesn't deal with international bankers.

In our own time, the major tragedy caused by the Jewish central bankers (other than the slow roasting of the United States) was Barack Obama's demolition of the extremely functional nation of Libya, which had a bank very much like North Dakota's, totally devoted to its own citizens.

Qaddafi was described by mainstream media as a "blood sucking monster" and by Obama as someone who was abusing his own people, but in reality, Goodson notes, he had the support of 90 percent of his own people.

Why was that, and why was Qaddafi not the monster Obama made him out to be?

All Libyans received free education, students were paid to study; free electricity; free health care; free housing (no mortgages); newlyweds got

\$50,000; autos and loans were provided free of interest; bread was 15 cents per loaf; gas was 12 cents per litre; portions of oil profits were shared with citizens; farmers received free land, seeds and animals; the unemployed were paid as if they had jobs. Beggars and homeless people did not exist.

That Obama said Qaddafi was abusing his people perfectly reflected the lies that have been told about all enemies of the Jewish central bank throughout history. Yet all those countries have been destroyed because the vast majority of duped people believed the vicious lies that were told about them by Jewish media.

This same syndrome played into the destruction of Iraq and threatens to accomplish the destruction of Iran.

Whether in Russia, or Japan, or Germany, or Libya, those nations whose reliable leaders created just societies to the advantage of all their inhabitants, these nations fell victim to the Jewish international bankers, whose aim is to turn the whole world into a ghetto in which they may ride roughshod over everyone, kill whomever they wish, and turn the world into a godless prison where, as Adolf Hitler once predicted, humanity will meet its ultimate fate in an endless wasteland of doom and depression.

And as Winston Churchill once accurately assessed, it will all be because of the Jews and their particular and inexplicable brand of insane sadism.

The only possible way for humanity to survive is to do away with every trace of this destructive Jewish legacy. Understanding the malicious nature of their debilitating financial system and doing away with it in all its aspects in the first essential step in attempting to create a sane, understanding and compassionate world.

It can be done, but not without understanding and neutralizing the criminally insane activities of the Jews, as Napoleon so rightly said before he was deposed and exiled by the Jewish money power that is the enemy of everyone on Earth.

Money Creation Deception Defrauds the Whole World
